1. ■ ■ ■ ■ ■ CMA CGM Group VGM Solution

The International Maritime Organization (IMO) has amended the SOLAS (Safety of Life at Sea) convention under regulation 2 of chapter VI which mandates the declaration of the Verified Gross Mass (VGM) of a packed container before loading on board vessels within a prescribed cut-off date / time to the shipping line and / or port terminal authorities.

Acknowledging this major change in the industry, a new step has been added to the Cargo Export process. CMA CGM Group has put particular attention into **making this new task as easy as possible** for you. To achieve this, the functionality we propose relies on two factors:

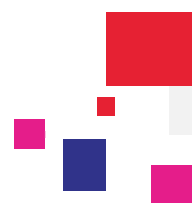

- **Visibility** on the current VGM Status of your shipments: a VGM dashboard will provide a global vision of the status of all your shipments so that you can always know if you are up to date
- **Easy submission** of your VGM data: through our Excel template based mass upload functionality

This tutorial will show you how to use these two new functionalities. The prerequisite is to have an active user account and to be logged in, as shown below:

Connect to your eBusiness account eBusiness menu / VGM Dashboard or VGM Upload

The image shows a screenshot of the eBusiness application interface. On the left, there is a navigation menu with various options. The 'VGM Upload' and 'VGM Dashboard' options are highlighted with a red rectangular box. A blue arrow points from this box to a 'Sign In' form on the right. The 'Sign In' form has a title 'Enter your login (email) and Password' and a subtitle 'Sign In'. It contains two input fields: 'Login (Email)' and 'Password:'. Below the password field is a link for 'Forgotten Password?'. A pink 'Sign In' button is located at the bottom right of the form.

2. VGM Dashboard: Visibility on your VGM Status

Am I missing any VGM on my shipments ? I submitted VGMs, have they been validated ?

These are the type of questions which you will be able to answer with the **new dashboard**, accessible from the **eBusiness/VGM Dashboard** menu and designed to enable you to see the exact VGM status of all your shipments.

The screenshot shows the 'VGM Consult' dashboard. At the top, there are navigation tabs: 'The Group', 'Products & Services', 'eBusiness', 'Local Offices', 'Help', 'News & Media', and 'Finance'. A search bar is on the right. Below the navigation, the breadcrumb path is 'Home > eBusiness > Booking / Shipping Instructions > VGM Dashboard'. The main heading is 'VGM Consult'. A filter dropdown shows 'Showing: Booking party'. Below this is a table with the following data:

Booking ref.	Container	Tare (KGM)	VGM integrated	Name or signature	Current status	Cutoff Date
LHV14						
<input type="checkbox"/> LHV1404665	CMAU0584341	2,190.00			In error (40000 KGM)	7/20/2016 5:00 PM
<input checked="" type="checkbox"/> LHV1404657	ECMU1566480	2,230.00	7,788.00 KGM	JEAN DUPONT	Validated	7/13/2016 5:00 PM
<input checked="" type="checkbox"/> LHV1404714	GVCU2031651	2,230.00	2,320.71 KGM	JANE ZHEN	Validated	7/1/2016 7:00 PM
<input type="checkbox"/> LHV1404714	Not Assigned					7/1/2016 7:00 PM
<input type="checkbox"/> LHV1404076A	CMAU1848161	2,190.00	14.00 TON	BSALARA	Validated	7/1/2016 6:00 PM

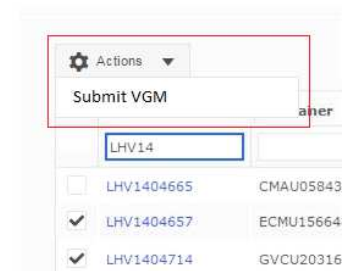

Below the table, there is a 'Cutoff Status' legend with two items: 'Imminent' (warning icon) and 'Outdated' (warning icon). Navigation buttons (K, <, >, X) and '1 - 13 of 13' are at the bottom right.

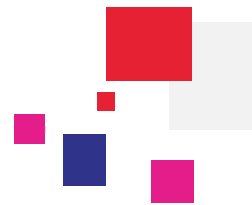

You will find on this dashboard all the **shipments for which you appear as any party** type such as booking party, shipper, consignee, etc. You may filter this to the shipments where you only appear as a particular party type, such as 'Booking Party' as shown in the above example. The various columns enable you to see the **current VGM value and status** for your containers, and the final column indicates the containers for which the cut off date is imminent or outdated with an icon.

As for any other dashboard on the platform, you have the possibility to **filter and sort** the columns as you need. This may help, for example, to isolate the shipments for which the VGM is still pending.

This dashboard is also an **entry point to submit your VGM Data**.

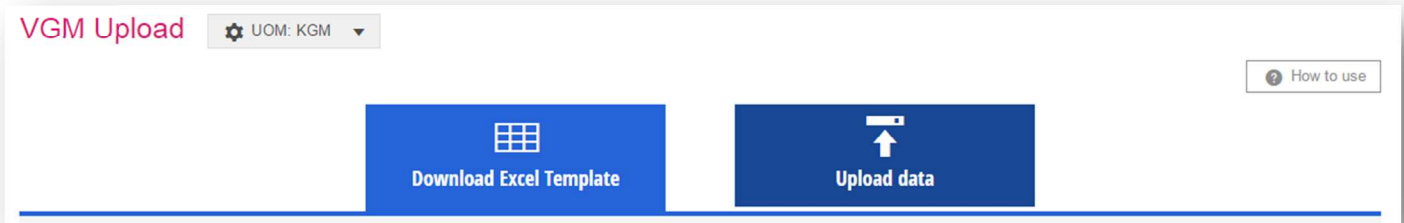

You can select any line of the dashboard using the first columns containing checkboxes and select the **Submit VGM** action menu. You will be then redirected to our VGM submission pages pre-filled with your selection.

3. ■■■■■ How to submit your VGM Data

The VGM Upload page is accessible from the **eBusiness/VGM Upload** menu. It is divided into two main sections:

The **Download Excel Template** section enables you to **prepare your Excel template**. It is described in “Step 1” below and it allows you to:

- Download an **Empty Excel Template** and fill it in yourself. This is useful if you already have all your data prepared in another source or if you want to see the template format to build an automated extraction from your system.
- Or download a **Pre-Filled Excel Template** based on your container or booking numbers and complete it before submission.

The **Upload Data** section enables you to **upload a complete Excel template, verify the coherency of your data and submit it** to us. This is described in “Step 2” below.

4. ■■■■■ Step 1: Prepare your VGM Template

You have two ways to prepare your VGM template either from VGM Dashboard or by free text in VGM Upload.

- From **VGM Dashboard**: As explained earlier you can select the various containers you want by clicking in the checkbox column on the left and then use the action menu **Submit VGM**.
- By free text in the **Download Excel Template** section: You can either download the empty template or input shipment or container references to get a pre-filled template.

Verified Gross Mass (VGM)

CMA CGM Group eBusiness

The screenshot shows the VGM dashboard with three main sections:

- From Booking ref. list:** Includes a text input field containing 'LHV1403876' and 'LHV1403873', and a 'Download Template' button.
- From a Container list:** Includes a text input field for a container list and a 'Download Template' button.
- NO reference:** Includes a 'Download Empty Template' button.

1. Your bookings/containers reference is automatically inserted in this part if you arrive from the VGM Dashboard or enter it manually into the box **From Booking ref. list / From a Container List**
2. Click on button **Download Template**. You can specify several bookings/containers separated by a , or ; or with a space

An excel file is downloaded with the list of lines corresponding to your request. Enter all the mandatory values (noted with an *): VGM, UOM & Signature.

	A	B	C	D	E	F	G	H	I
1	Booking Reference*	Container Number*	SOC (Y if SOC)	Tare weight KGM	VGM* (including tare) UOM*		Name or Signature*	Method (SM1/SM2)	Certificate
2	MBE0246998	BEAU2270018	Y	2210	6525.9 KGM		TEST SIGNATURE 1		
3	MBE0246998	ECMU2104911		2230	6525.9 KGM		TEST NAME 1		
4	MBE0246998	TEMU4007020		2200	6525.9 KGM		TEST SIGNATURE 2		

5. ■■■■■ Step 2: Upload data

Save your document on your computer and then go to the **Upload data** section. To upload your Excel file you need to click on the **Select File** button. You can then navigate to the location of the file on your computer and validate the Upload.

The 'VGM Upload' interface includes:

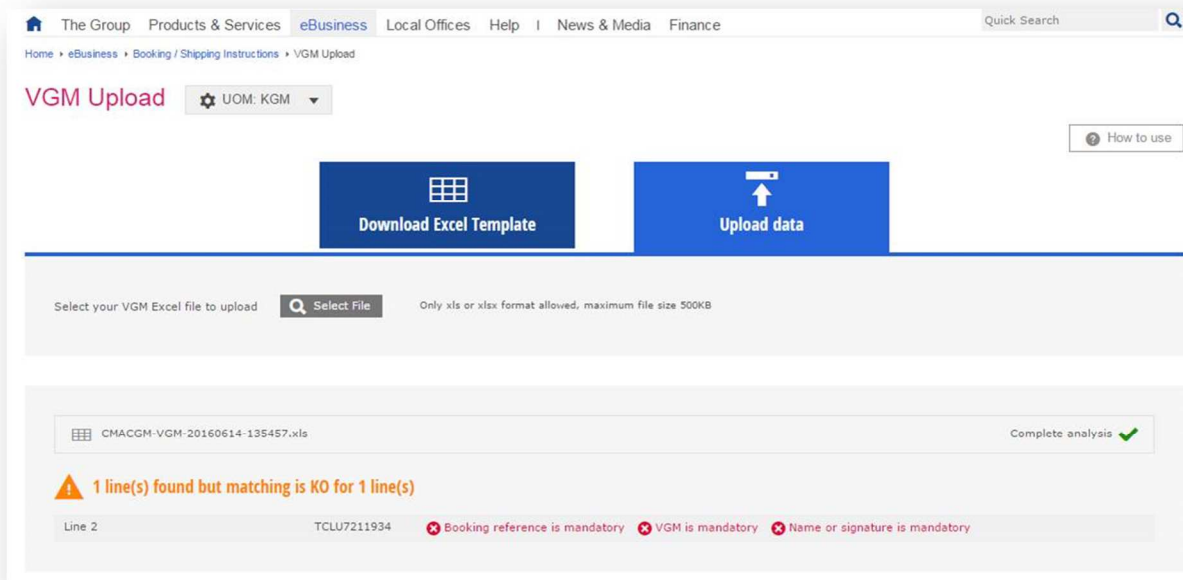

- A dropdown menu for 'UOM: KGM'.
- 'Download Excel Template' and 'Upload data' buttons.
- A 'Select File' button with a magnifying glass icon.
- A note: 'Only xls or xlsx format allowed, maximum file size 500KB'.
- A 'How to use' help button.

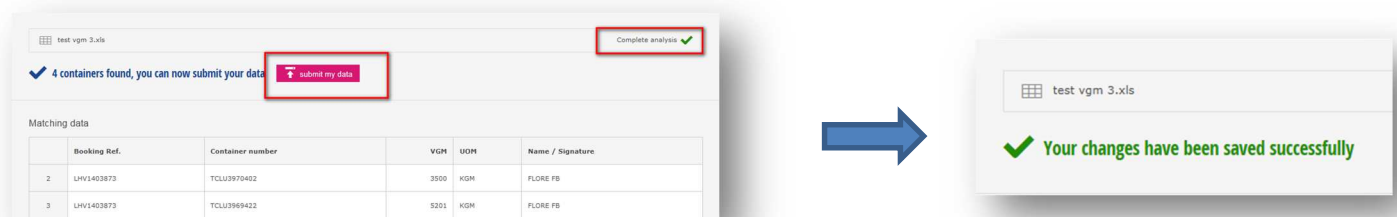

Verified Gross Mass (VGM)

CMA CGM Group eBusiness

Your Excel template will then be evaluated by our platform and if there are errors they will be reported to you in red with a meaningful error message which will help you fix the problem. In this case you have to modify the Excel file on your computer and re-upload it by clicking on **Select File**.

Once you have correctly completed the Excel file, the following screen appears listing all the values that have been found in the file. You can then click on **submit my data** to finalize the process. Upon submission, you will be able to see on your VGM Dashboard that the status for these shipments now shows as **Submitted**.
