

CMA CGM+

CARE
Protect your business

BARLOCK SECURITY DEVICE

Protect your valuable products against theft during transportation with the simplest, most effective solution.

YOUR BENEFITS

**ENHANCE
CARGO SECURITY**
Add an extra layer of security with our steel

BARLOCK SECURITY DEVICE.

PREVENT COMPLICATIONS AND RELATIVE COSTS

Securing your containers will help lower your insurance premiums by using a safer way to transport your cargo. It will also prevent the extra cost of having your cargo stolen.

SIMPLE PROCESS

Easily installed, the device is delivered directly by CMA CGM to the requested depot.

IDEAL OPTION FOR THE FOLLOWING COMMODITIES

High-value cargo, beverages, shoes, garments, high-tech and luxury products.

HOW DOES IT WORK?

- BARLOCK SECURITY DEVICES are made of steel and are easily installed on the container to secure doors.

- They can only be opened at the destination using a circular steel saw, making it much more difficult to breach your container than with a regular seal.

- To ensure traceability, the barlock number is added to the Bill of Lading.
