

REEFLEX

LIQUID READY

The most efficient and cost-effective solution for transportation of liquids in 20' and 40' refrigerated containers.

YOUR BENEFITS

TRANSPORT LARGER VOLUMES

Can safely carry up to 26,000 liters in one trip; helps recover 10% to 30% more payload compared to standard drums and intermediate bulk containers.

COST EFFECTIVE AND EASY TO USE

No need to prepack your products before export. Loading/unloading takes only 60 minutes.

EXCELLENT QUALITY PRESERVATION

Precise control of temperature between -25° and +30°. Optional aseptic processing.

HYGIENIC AND ECO-FRIENDLY

Prevents contamination thanks to the single use bag and the optional aseptic Camlock valve. Fully recyclable.

HOW DOES IT WORK?

- CMA CGM experts set up the REEFLEX LIQUID READY monobloc flexitank into the Reefer container.

- An external pumping system loads or unloads liquid through a bottom valve camlock.
- Products are kept at the right temperature in a confined environment throughout transport and delivery.
- Thanks to anti-wave technology, REEFLEX LIQUID READY keeps liquids stabilized, avoiding surge and sloshing.
