

CMA CGM Group eBusiness

CMA CGM supports various eBusiness solutions to streamline the processing of your shipments.

E-business provides a quicker, more efficient documentation process. Data accuracy will improve, the time spent re-keying data will be reduced and exports documentation fee will be discounted. Another key benefit is increased visibility to shipments.

Choose the way which suits you best for electronic trading with us; online at www.cma-cgm.com OR via 3rd parties' portals (like INTTRA), or via EDI (system to system connection).

CMA CGM Web platform is your online self-service e-business tool for booking, managing documentation, and tracking the progress of your shipments. After registering online you will be able to book shipments, create shipping instructions, review BL drafts, print bills, gain visibility to your shipments with online tracking and personalized notifications, and view your account invoices anytime - 24/7.

For Shippers' requiring standardised processing across a multi-carrier network, it's recommended to use INTTRA, CargoSmart, or GT Nexus web platforms

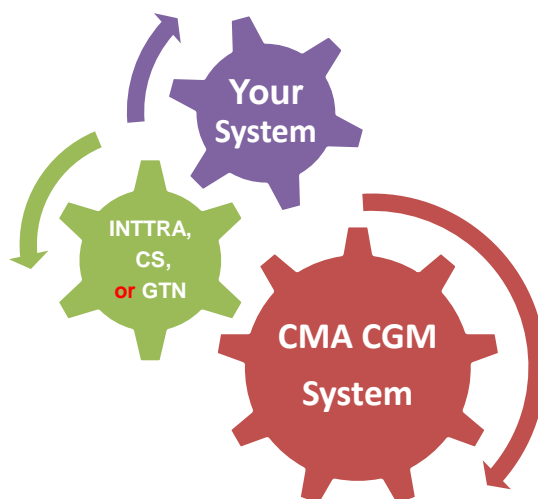

EDI Solutions: System to system via EDI for eBooking, eShipping Instructions, and Track & Trace. It suits large volume shippers and forwarders.

Direct EDI: in Australia & New Zealand, CMA CGM system is connected directly to CargoWise system.

Or via 3rd parties systems (INTRA-iLINK , CargoSmart and /or GT Nexus)

Today, there are various systems connected to CMA CGM system via these types of connections: **BSM, BabelBridge, Ozdocs, Trident Global** and others.

Not sure which connection suits you? Or would like to know if your system connected to ours (directly or through 3rd party)?

Our eBusiness team will be happy to assist and answer all your questions.
