

CMA CGM launches a new **RO-RO** Med service connecting Morocco and Europe

October 12th, 2017

To our Valued Customers,

The CMA CGM Group, a leader in container shipping, will launch an innovative **RO-RO service** connecting Morocco to Europe (Marseille, Port Vendres and Genoa): The Morocco Express.

The New RO-RO service will deploy 3 loops offering a capacity between **65 and 180 trailers per voyage**. It is a competitive and speedy alternative to the road transport transiting through Spain connecting Morocco.

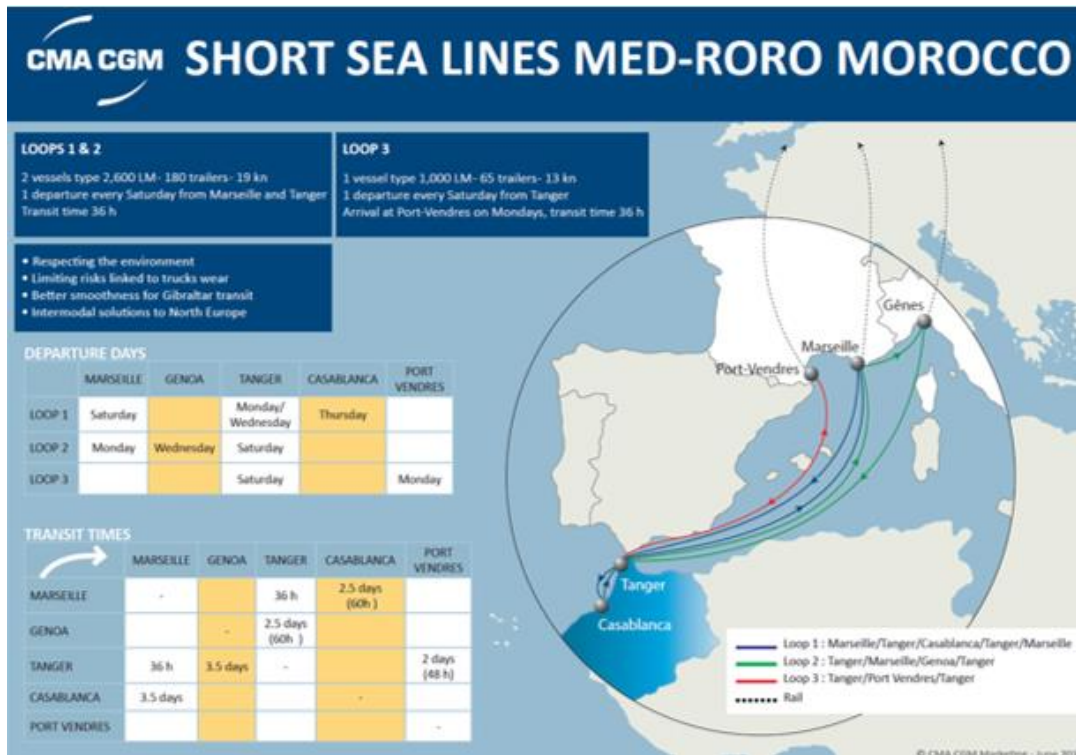

The first departures are scheduled simultaneously on **October 21st, 2017** ex Tangiers and Marseille.

3 Different rotations for optimized service

The Morocco Express is composed of 3 loops between Morocco and the South of Europe:

- Loop 1: weekly service on a fixed day, available throughout the year. It connects Casablanca and Tangier to Marseille with 3 departures per week from Morocco on a ship with a **capacity of 180 trailers**.
- Loop 2: weekly service on a fixed day, available throughout the year. It connects Tangier to Marseille and Genoa with 2 departures each week from Southern Europe on a ship with a **capacity of 180 trailers**.
- Loop 3: weekly service on a fixed day, available from November to April. It connects the port of Tangier to Port-Vendres with 1 departure per week from Tangier on a ship with a **capacity of 65 trailers**.

An offer combining reliability & respect for the environment

Reliability:

- **Faster:** only 36 hours separate Tanger and Marseille, for example
- **Safe** mode of transport: low risk of delay and road accidents
- **Simpler:** ships suitable for transporting trailers
- **Frequent** departures: several departures per week for each loop

Environmental compliance:

the Morocco Express service reduces CO2 emissions by 43% compared to road transport transiting through Spain. 64 000 tons of CO2 can be saved each year by giving priority to shipping by sea.
