Appendix – Ban on Onions Lifted [25/08/14]

La politique de stabilisation et de promotion des produits agricoles locaux, consacrée par le gouvernement, a favorisé l’Émergence de la filière oignon dont le niveau de production, au cours des dernières années, est passé de 340,000 tonnes en 2008 à 340,000 tonnes en 2012.

Projeté à près de 250,000 tonnes en 2013, le niveau de production évoqué ci-dessus devrait permettre la couverture des besoins de consommateurs du pays sur une période d’une année entière (12 mois).

Ces chiffres, qui servent de base à la décision d’acheter le marché qui pèse sur le marché des oignons, ont été établis par le gouvernement après une série de consultations et de discussions avec les producteurs locaux.

Sur la base de ces chiffres, le comité a pris, à l’unanimité, la décision de lever le gel des importations le 25 Août 2014.

Cela signifie que les organismes doivent prendre toutes les dispositions nécessaires pour l’application de cette mesure.
